

FLOOD BOLD

Adding green and infiltrating rainwater in urban space: that is the challenge we are facing today. We offer a solution with the Rain(a)Way Flood Bold-tile. This half-open tile has a unique shape, can infiltrate rainwater and makes space for green.

The Flood Bold is fit to drive on which makes it perfect for parkingspots and infiltration gutters and -drains. This tile creates a unique esthetic on a standard street. Rainwater can infiltrate through the open spaces in the tile, which can be filled with different high-draining fillers.

Benefits

- Contributes to the solution to urban floodings
- Stores and infiltrates rainwater
- Suitable for predominantly static heavy traffic up to 10 tons of axle load
- Versatile application possibilities because of varying fillings
- Perfect to combine with the Rain(a)Way Ebb-tiles
- Contributes to the solution to heatstress
- Easy to apply because of standard tile-size

The open spaces make it possible to infiltrate large quantities of rainwater and it makes space for green!

Fillings

The Flood Bold creates possibilities to add green in a new way: plants, grass or moss can grow in the hollow spaces. The tiles can also be filled to the brim with gravel or shells, which are not as green, but can still infiltrate large quantities of water. A special shell-substrate has been developed that infiltrates perfectly and is suitable for a variety of different plants.

Conditions for application

The tiles can be laid both straight and in semi-brick patterns. The combination of the right filling and substrate makes every location climate proof. Different situations asks for a different fillings, we are happy to offer you advice for the best result.

Colours

We produce the tiles in grey, but orders larger than 250m² can be produced in all colours. Contact us for more information.

Size

30x30x12 cm
15,7 kg

Material

Concrete

“It gives rainwater function and makes it visible in a fun and playful manner. Rain(a)Way starts a discussion: how can we deal with rainwater problems?”
